FOOD & BEVERAGE CAPABILITIES
TAP IN TO THE BEST VALUE IN WATER PURIFICATION.

MECO is a leading provider of pure water for critical manufacturing processes in the food and beverage industry. The MECO global portfolio includes the broadest range of engineered products for purified water, distilled water and pure steam. Our broad range of products produce quality feedstock and wash water for the world’s bottled water, sports drinks, sodas and food products. This depth of global experience ensures we understand the critical nature of maximized uptime for your operations.

Whatever your requirements—from pretreatment through production, storage and distribution, a single unit at any size or a complete integrated installation—MECO answers with the ideal combination of highly experienced engineers, state-of-the-art manufacturing and first class service.

We are relentless about finding the best solution to our customers’ needs. One that offers the highest quality of product while reducing operating and capital costs. Our entire team, from engineering to manufacturing to service, takes a studied and methodical approach to everything we do. It’s part of our culture and a key component of our DNA.

CHET NUNEZ, DIRECTOR OF APPLICATIONS
ONE SINGULAR FOCUS. ENGINEER PRODUCTS FOR WATER PURIFICATION.

We are engineers, so identifying the ideal solution to complex problems is something that comes natural to us. Our entire culture is built around the values of attention to detail, problem solving and working in the most efficient manner possible. As a company, our engineers, our lean manufacturing team and our quality service department work in synergy to deliver the most logical solutions to your exacting specifications. Moreover, once the right solution is found, our engineering approach pays continuing dividends through an efficient system design, ensuring validation, preventive maintenance and offering the peace of mind that comes with the continuing support from true problem solvers.

"Our focus is squarely on the industry, technology and most importantly our customers. We enjoy establishing trusted relationships and a commitment to one another that lasts a lifetime.

GEORGE GSSELL, PRESIDENT
DEEP EXPERIENCE AND A BROAD RANGE OF SOLUTIONS.

MECO’s extensive knowledge of water purification has made us a trusted source for purified water and steam. We use that expertise on behalf of our clients to develop new and more efficient solutions featuring a wide spectrum of purification products and systems. Because we’re able to seamlessly integrate all of our services and products to maximize efficiency, we’re often called upon to oversee the entire process. And MECO equipment has long been considered the best in the industry.

PRODUCTS:

- Carbon Filtration
- Water Softening
- Electro-deionization
- Ion Exchange
- Micro and Ultrafiltration
- Reverse Osmosis
- Pure Steam Generators
- Vapor Compression
- Storage and Distribution Systems

From determining user requirements to installation and operational qualification to the service maintenance long after a system’s commissioned, we deliver integrated services to ensure the best water purification solution.

SHARIF DISI, VICE PRESIDENT OF SALES
RELIABLE, RESPONSIVE SERVICE HELPS ENSURE MAXIMUM UPTIME.

Our water purification plants are everywhere and our people are too. You’ll find us across the globe supporting our products. We know that maximum uptime is critical to your productivity, so when you have a problem, you have a service representative who knows what he’s doing. You can rest assured that MECO service personnel are factory-trained specialists supported by our entire organization.

The design, construction, operation and maintenance of water purification plants is not a sideline for us, it’s all we do. When you communicate with us, everyone on the MECO team knows what is expected.

"The technologies used to produce pure water are not simple. They use sophisticated control systems to produce water to exacting standards from sources that are often variable. Our people are trained experts backed up by experts. We’ve seen a lot over the years, but we never stop learning."
